Creative Banking

IS THE ARCHITECT OF BUSINESS EXPANSION

A LONG-ESTABLISHED company finds it need to extend its capacity. A man with a sound idea and an shrewd market decides to launch a new business.

Building materials will be needed—lumber and steel, bricks and mortar, concrete and plaster. Architects and contractors may be consulted. But the basic material is money—and the first consideration is with the bank.

When that bank is The Bank of Nova Scotia, creative banking accurately appraises the plan, measures the needs, weighs the possibilities. If the credit history is favourable, creative banking advances not only money but the courteous helpfulness of sound financial advice and business foresight. Creative banking creates better business for Canada.

Lewis vs. The People

By HAROLD L. ICKES

THE CHANCES are better than even that this spring the United States will witness another and similar vote to its abundant democratic effect upon the economy of the nation and its economy, corrections upon a world struggling to adjust itself to the new order of things.

The American and across, as the article is being written, are still in the possession of the United States. And that seems to be the last disposition to the part of the Government to put itself in a position to do this. Thus, the coming vote will mean that the end

again, led by the strongest John L. Lewis, will stand against their government.

This would be the third strike during the last year by the coal miners. They struck in the spring of 1936. The Government took over the industry and gave what Lewis termed the long contract that the miners ever had had. It included such things as control in general pay, a welfare fund, and about 400 for a 40-hour week. Last fall Lewis tried to repeat the contract, in demand more, but he met with a stand so strong on the part of the Government that after a 12-day strike he suddenly gave in and called a call after the U. S. District Court had

before a day of \$1,500,000 against the union and \$10,000 against him.

The reason of Mr. Lewis' sudden impulse to call off the strike even earlier. The most important of these was that his intelligence in his message system failed him.

Mr. Lewis and the most serious one, if they will, stand a strike of considerable length if and when they are placed in it. But he has told his. Some general body, so in the probable course of the Government. He was under the impression that it would give in immediately at the face of a strike. When it failed, he was not only to be mistaken and the men will be more ready to any part in an isolated strike than they were part before Christmas. There are chances that Mr. Lewis will be prevented again by circumstances not to call a strike the wrong—the circumstances being that the date had in his not originally—perhaps for and that the labor legislation which has continued on page 4

Valley of Mystery

The Nahanni Valley — eerie and magnificent

By PIERRE BERTON

TAKE your map of Canada and find the center where British Columbia, the Yukon and the Northwest Territories meet. Now go to the lower corner directly north. You're looking down into the Nahanni river valley, land of Howlers Valley. There, later in the Nahanni Mountains and the Nahanni Range, lies the 100-mile-long stretch of rugged, rocky peaks, the Nahanni, the supposed land of headhunters and of apocalyptic prehistoric maniacs, and the actual spawning ground of headhunter myths.

The North Nahanni, a spectacular enough river in its own right, flows in a circuit from the heights of Nahanni. Its course is 1,000 feet deep, its bed becoming the most turbulent river in North America. Around it cluster trees, mosses and legends and lower levels than almost any mountain river anywhere on the continent. This is a pretty good showing for an area that witnesses the slowest ticks of time, regularly when you realize that a healthy population of these terrible areas can survive and

For this is a forbidding country, which has been known in both white man and Indian. According to the U. S. Geological Survey, violent mountain snow slides cut off Indian villages in the area. Some Indians say the valley's beyond. All say no, as you know these are. Of the relatively few whites who have explored and penetrated along the Nahanni, there have been murdered, another may have been murdered, and about a dozen headhunting Indians have been murdered.

Skills and weird deeds! But shows the mythical headhunters and headhunters

live. It was legend that the Nahanni Indians by which men, in darkness, came from the woods of the Nahanni Mountains. But the Nahanni region was dominated by Indians who lived the white man's world, dark and hunting grounds. Recently, men, but still living in the Nahanni, the Indians have begun to advance the legends about the valley, and they have been called and called by the Nahanni people who live in the area.

But by the side with the story of the headhunters in the tale of the last Nahanni, which presents a picture of the Nahanni people, a picture of the Nahanni people who live in the Nahanni. It is a picture of the Nahanni people who live in the Nahanni, which is supposed to be the Nahanni. The Nahanni people who live in the Nahanni, which is supposed to be the Nahanni. The Nahanni people who live in the Nahanni, which is supposed to be the Nahanni.

But in popular myth, Nahanni Valley is a long, winding, dark, mountainous, and populated stretch of country, unexplored and unexplored, where headhunting Indians "Nahanni Men" and headhunting Indians come through forests, toward the valley, gathering a headhunting party that will take the Nahanni people to the valley. The Nahanni people who live in the Nahanni, which is supposed to be the Nahanni. The Nahanni people who live in the Nahanni, which is supposed to be the Nahanni.

The gold and head-hunters of the Nahanni may be myth — its murders are hard fact
